

Inline Reverse Osmosis Post-Filter

Granular Activated Carbon R.O. Post-Filter						
Product Number	Model Number	Gallons Per Minute	Nominal Micron Filtration	Overall Dimensions (in.)	Qty. Master Pack	Qty Per Package
AICRO	AICRO	.5	.5	10" X 2"	12 ea	1

The AICRO Inline Polishing Filter uses coconut granular activated carbon to reduce chlorine taste and odor from your drinking water. The AICRO comes with built in 1/2" FPT connections and is used as a polishing filter in Watts Flowmatic manifold reverse osmosis systems.

The AICRO product specifications:

- .5 Micron Rating
- .5 GPM flow rate
- NSF certified
- removes chlorine taste & odor
- max pressure 125 PSI
- max temperature 100 F°
- 1500 gallon capacity
- 1/2" FPT fittings

Deluxe Drinking Water System

DW-600 & WIC 600 Deluxe Drinking Water System					
Product Number	Model Number	Nominal Micron Filtration	Overall Dimensions (in.)	Operating Pressure (PSI)	Temperature Range (F°)
DW600	DW600	.5	3 x 3 x 13.5	30-125	40° - 100°
WIC600	WIC600	.5	3 x 3 x 13.5	30-125	40° - 100°

- DW600 Undersink and WIC600 Icemaker quick-connect/ quick-disconnect filters.
- Single cartridge system reduces cysts(>99.95% of Giardia & Cryptosporidium), lead, chlorine, lindane, atrazine, bad taste and odor, and sediment.
- Carbon block cartridge filters particles as small as 1/2 micron and lasts up to 6 months or 500 gallons.
- Built-in shut-off valve and light-weight, compact cannister simplify filter change w/ just ¼ turn---no tools needed---no dirty filters to handle.
- Installation hardware, filter cartridge, and lead-free faucet included (DW600 only).
- Virtually no spillage of water during replacement process.
