

Replacement Cartridges for Discontinued R.O. Systems

American Plumber WRO-3167		
R.O. Membrane (TFC)	Carbon/Sediment Pre-Filter	Carbon Polishing Post-Filter
ROM26T	W5C1P	WCC

WaterSoft ML3CTA		
R.O. Membrane (CTA)	Sediment/Carbon Pre-Filter	Carbon Polishing Post-Filter
M3CTA	M3SED	M3GAC

WaterSoft ML3TFC		
R.O. Membrane (TFC)	Sediment/Carbon Pre-Filter	Carbon Polishing Post-Filter
M3TFC	M3DGAC	M3GAC

Meco-O-Matic Chemical Feed Pumps

Mec-O-Matic Stingray Chemical Feed Pumps						
Product Number*	Maximum Feed Gallons 24 hr - 1 hr	CC Per Min.	Max Operating Pressure (PSI)	Strokes Per Minute	Ship Weight (lbs)	Volts
SR2101	11.4 - .32	30	125	10	8	115
SR2251	29.8 - 1.2	78	125	26	8	115

Includes: metering pump, white discharge tubing, clear suction tubing, foot valve/strainer assembly with tube weight, auto-clean injection valve assembly, and instruction book.

Chemical Feed Pumps for Water Wells

Meco-O-Matic produces chemical feed pumps designed specifically for treatment of private water supplies. These pumps can dispense a chlorine solution into the water system to ensure bacteria-free water, burn off undesirable odors and remove stain-causing iron and other water-borne elements.

Hydrogen Sulfide Water

A Mec-O-Matic Feed Pump System feeding chlorine will oxidize the hydrogen sulfide, as well as other sulfides, making it tasteless, odorless, colorless elemental sulfur. If a combination of hydrogen sulfide and iron are present, a feed pump injecting chlorine followed by a sediment filter are necessary. The taste and odor of residual chlorine can be removed by an activated carbon filter.

Chemical Solution Tanks

The **Tank Stand Feeder (TSF)** system is designed primarily for applications requiring small amounts of chemical to be fed into a water supply. The chemical storage tank and feeder pump assemble to a common base. The chemical tank includes a tight fitting lid to keep the chemical free of contaminants and protect the surrounding area free from chemical fumes.

Mec-O-Matic TSF Solution Tanks		
Product Number	Capacity (gallons)	Weight (lbs)
U8800449	7.5	8
U8800667	15	9

A TSF system consists of: chemical tank with lid, base, bulkhead fitting, chlorine/pH test kit, feeder mounting hardware, and maintenance manual.
