

Chemical Feed Pump Parts**Anti-Siphon Valve**

Mec-O-Matic's patented anti-siphon valve is simply installed in the feeder discharge line to eliminate the possibility of chemical siphoning through the feeder.

Product Number: 8800406**Ball Valve Kit**

Ball valve kit for 1000C and 2500C pumps. Contains two sets for single head pumps and four sets for dual head pumps.

Product Number:
Single Head Pump: 8800704
Dual Head Pump: 8800554**Super "C" Head Kit**

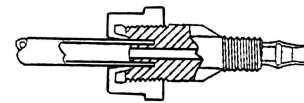

Includes head for "C" Series pumps and valves.

Product Number:
Single Head Pump: 8800235
Dual Head Pump: 8800701**Flow indicator**

The Mec-O-Matic indicator meets the revised NSF standard requirement for a visual signal to easily determine that a pump is delivering solution. The indicator is easily attached to the supply line or discharge line and a ball visually indicates that the solution is being delivered by its position in the indicator.

Product Number: 7012309**Injection Fittings**

The exclusive Mec-O-Matic "Auto-Clean", a patented device, reduces the dangers of mineral buildup at the point of injection. As the chemical passes between an elastic sleeve and the PVC body, the sleeve undulates, breaking off any minerals that may have collected on the injection point.

Product Number: 8800606**Diaphragm Replacement Kit**

Feeder diaphragms are made of teflon. Teflon is impervious to most chemicals. For repair of 1000C and 2500C series pumps.

Product Number: 8800470**Strainers**

4" poly strainer

Product Number: 8800456**Chlorine Test Kit**

This set is a simple but effective chlorine residual test kit. Instructions for use are included in the handy plastic carrying case.

Product Number: 8800410
