

**Chem-Tech Series 100 Chemical Pumps**

The CHEM-TECH Series 100 is the standard by which all other dosing pumps are judged, CHEM-TECH Series 100/150 pumps with motorized-diaphragm technology deliver dependable performance and extended longevity. The Series 100/150 provides quiet, consistent metering over long periods of time in a compact form.

A tried-and-true electric motor transfers power via a sealed gearbox and eccentric cam for smooth, reliable dosing.

Simple, adjustable system with knob and locking lever provide easy flow rate control and turndown.

The compact, injection-molded housing and clear pump head offer both affordability and chemical resistance.

The industrial grade, low-stress diaphragm provides long life, even in harsh conditions and continuous duty cycles.

Series 100 Models - The preferred metering pump for water conditioning professionals around the world. Perfect for applications where economical, consistent performance is required. Capable of a wide range of flows, from less than 3 gpd (0.47 lph) up to 30 gpd (4.72 lph) and pressures up to 100 psig (7 bar).

**Features:**

- Guided Quad Check Valve System
- Bleed Valve Assembly Standard
- Feed Rate Control
- Duplex Head Models Available
- 150 PSI and 200PSI Models Available
- Pump Head & Fittings: PVC
- Seats & O-rings: Hypalon
- Balls: TFE
- Suction Size: Tubing .44" PVC
- Discharge Size: .50" PE
