Norwesco 2500 Gallon Below Ground Holding Tank

The 2500 is the largest capacity below ground storage tank made today. Typically used to store water - both potable and non-potable - it can also be used as a large capacity septic tank. The end ribs will accept fittings up to 4" in size. Integral columns in the tank give it excellent structural strength. For buried use only. Do not use above ground.

Norwesco Cistern Tanks

Norwesco's below-ground water cisterns feature ribbed design for underground installations. They are ideal for instances when drinking water must be hauled in or if a well just doesn't meet consumption needs. These cisterns are produced with 100% virgin resin which meets FDA specifications for potable water. . For buried use only. Do not use above ground.
