

Myers Regulating Valves

17527B3 Regulator Valve

19280C Unloader Valve

Accurate, adjustable regulators maintain constant system operation pressure, protect pumps from excess pressure, and thus reduce maintenance and down time.

Unloaders reduce pump maintenance and power consumption; maintain constant pressure when system is in operation; eliminate bypass cooling; and extend life of entire pump. When flow is shut off, the unloader automatically reduces pump pressure to nearly inlet pressure thus unloading the pump.

Myers Regulating Valves					
Product Number	Valve Style	Rated Capacity (GPM)	Rated Pressure (PSI)	Use with Pumps	Approx. Weight (lbs)
14409C1	Regulator	5-25	50 - 1000	CX10, CX20	5
17527B3	Regulator	10-20	200 - 1000	CX10, CX20, C20	5
16680C1	Regulator	2-12	200 - 700	CX10, BX6	5
11550B	Regulator	2-6	30 - 300	AO2, AO4	3
11550B1	Regulator	2-4	300 - 600	AO2, AO4	3
11550B2	Regulator	6-12	30 - 300	AO84	3
19280C	Unloader	6-25	400 - 1500	BX6, CX10, CX20, C20	5
